Professional Summary

Senior React / Full-Stack MERN Developer with 4+ years of experience in building scalable SPAs and enterprise-grade web platforms. Skilled in **React.js, Redux Toolkit, Node.js, Express, MongoDB, and TypeScript**. Adept at crafting pixel-perfect UIs, optimizing RESTful API consumption, and driving Agile sprints. Proven ability to collaborate cross-functionally and deliver responsive, accessible, and high-performance applications. Experienced in Agile/Scrum methodologies, sprint planning, and stakeholder communication.

Technical Skills

Programming Languages: JavaScript, TypeScript

Frontend Technologies: React.js (Hooks, Context API, Redux Toolkit), Gatsby.js, jQuery, HTML5, CSS3, Bootstrap, React-Bootstrap, Tailwind CSS, Material UI

Backend & APIs: Node.js, Express.js, NestJS, Prisma, RESTful APIs, Axios, JWT, OAuth

Databases: MongoDB, Mongoose, PostgreSQL

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, JIRA

Development Tools: Visual Studio Code, Postman, CI/CD pipelines

Testing: Jest, React Testing Library, Cypress

Work Experience

Software Engineer – Full Stack (React / MERN) — May 2022 – Present

**Bahwan CyberTek
(BCT)**

- Led full-stack development across **5+ enterprise projects**, delivering scalable **frontend modules and backend services** on time and within sprint cycles.
- Developed and fine-tuned **20+ reusable UI components** using **React.js, Gatsby.js, HTML, CSS, and Bootstrap**, improving maintainability and load performance.
- Architected and deployed **Node.js and MongoDB**-based backend services, enhancing data throughput and scalability for high-traffic applications.
- Integrated and maintained **RESTful APIs and third-party services**, reducing API latency by 40% and enabling seamless backend communication.
- Delivered robust, type-safe codebases in **TypeScript and JavaScript**, resulting in a **30% reduction in bugs**, accelerating developer onboarding by 2 weeks.
- **Collaborated with cross-functional teams (design, QA, product managers) in Agile/Scrum sprints, ensuring on-time delivery of features and improving sprint velocity by 20%.**

Projects

Giant EIP – Full-Stack Developer

Jan 2026 – Present

- Built dynamic UI components with **React.js, Tailwind CSS, and HTML5**, ensuring **WCAG-compliant accessibility**, responsive design, and optimized performance through **lazy loading, code splitting, and Redux Toolkit**, reducing render time by 50%.

- Engineered secure backend services using **Node.js and Express**, developing **RESTful APIs** that improved query efficiency by 45%, and implemented authentication using **JWT, OAuth, CORS, and Helmet** to protect 100% of routes and prevent unauthorized access.
- Integrated APIs with **Axios**, enabling real-time data rendering, enhancing error resilience, and streamlining state-driven workflows across user interfaces.

API Gateway – Frontend Developer

Jun 2025 – Dec 2025

- Designed and optimized **RESTful APIs** for distributed cloud systems, improving request throughput by 30%.
- Built responsive UI components using **React-Bootstrap, HTML5, and CSS3**, enhancing cross-device compatibility and user engagement.
- Diagnosed and resolved UI/UX inconsistencies, boosting accessibility scores and visual consistency across modules.

Namo Bharat – Frontend Developer

Apr 2023 – Dec 2023

- Engineered modular, reusable components using **React.js**, reducing development time for new features by 25%.
- Integrated **RESTful APIs** and implemented responsive layouts, ensuring seamless performance across mobile, tablet, and desktop.
- Applied advanced state management with **Redux Toolkit and Context API**, improving data flow and reducing re-rendering overhead.

Star Health Insurance – Full-Stack Developer

Jul 2022 – Mar 2023

- Engineered backend APIs using **Node.js and Express**, supporting real-time data sync and reducing response time by 40%.
- Integrated third-party APIs to extend platform functionality, increasing user engagement by 20%.
- Managed **MongoDB** databases with **Mongoose**, ensuring data integrity and optimizing query performance across modules.
- Wrote unit tests with Jest and RTL, achieving 75%+ code coverage across critical modules.

Full-Stack E-commerce Website – Internship Project

Dec 2021 – Apr 2022

- Built and deployed a full-stack **MERN-based e-commerce platform** with separate user and admin interfaces on Netlify.
- Implemented JWT-based auth and cart logic with Redux.
- Designed a RESTful API with Node.js and Express; managed product, order, and user data in MongoDB.

Education

Measi Institute of Information Technology (MIIT)

2020 – 2022

Master's of Computer Application - MCA

- Percentage: 87
- **Coursework:** Advanced Algorithms, Database Management Systems, Web Technologies, Software Engineering, Artificial Intelligence

Certifications

- Internship Project – E-commerce website (React.js, Node.js, MongoDB) (2022)
- MERN Stack Web Development – Udemy (2023)
- Full-Stack Development – LinkedIn Learning (2024)
- NestJS Course – Udemy (2025)
